

Society for Endocrinology Purchases Pro-7 Membership Software for Membership and Business Growth

Pro-7 software will help Society grow in membership and turnover.

The Society for Endocrinology has just signed a contract for a fully integrated membership, events and web system from ProTech Computer Systems. Pro-7 will improve the Society's communication with members by recording all activities, transactions and correspondence in one central knowledge base.

The Society is the founder member and organiser of the British Endocrine Societies, to which all the main British endocrine groups are affiliated. As a learned body for both science and medicine dealing with the endocrine glands and hormones it aims to advance education and research in endocrinology for the public benefit.

They will be using the system to administer membership for BioScientifica Ltd's clients as an outsourcing division. (BioScientifica is the commercial subsidiary of the Society for Endocrinology).

Phase 1 of the project is to include membership and subscription processing for the European Society for Paediatric Endocrinology, the European Society of Endocrinology, the Bone Research Society and the British Fertility Society. The Society is also looking to pilot the Events Module for the Clinical Cases conference in late 2006.

Phase 2 is to include membership and subscription processing for the British Society for Paediatric Endocrinology and Diabetes and the Society's own membership in late 2007.

Kandis Ip, IT Manager at the Society for Endocrinology, says, "We selected ProTech because Pro-7 is functionally rich and extremely flexible. A key driver was the online abstract handling by their CPMS module."

She continues, "ProTech understood our requirements and demonstrated how Pro

would improve the service to our members and allow us to establish a more efficient and streamlined system with integration of all of our activities.

Although we are still in the very early stages of this project, ProTech have proved themselves to be very approachable and accommodating, and this was another key driver in our decision making process."

The engagement will include migration of data from the Society's various systems, and a comprehensive range of supporting services to facilitate the successful and timely delivery of this project. Kandis says, "We look forward to an accelerated implementation of just four months in order to provide immediate benefits to our members and maximise on Pro-7 investment."

About ProTech Computer Systems

Established in 1995 ProTech Computer Systems (ProTech) continues to experience sustained and successful growth.

ProTech provides specialist software solutions for Record, Relationship, Fundraising and Marketing requirements. ProTech software is used by many of the country's leading Not for Profit, Sports and Leisure, Trade Unions and Public Sector organisations.

ProTech headquarters are based in Birmingham. Dedicated facilities are provided to clients including support, training, development and implementation services.
